## Refurbishment Rafter Trays

### Product Description

Corovent refurbishment rafter trays are designed to prevent insulation from obstructing the ventilation and provide clear air passage from the eaves to the roof void. Designed for use on existing buildings during refurbishment, the RR46 is push fitted into place from inside the roof void, the hinged flap tucks under the insulation to keep the tray in place.

- Provides 10mm continuous air gap
- Universal size to fit most common rafter centres
- Can cope with varying roof pitches
- Fitted from within the roof void

<b>Product Requirements</b>	<b>RR46</b>
<b>Statutory Requirements</b>	To provide ventilation in accordance with Building Regs Document C2, BS5250:2011 and Building Standards (Scotland) Regulations
<b>Functional Requirements</b>	To prevent the insulation from obstructing ventilation and provide 10mm per metre clear air gap within existing roofs where tray is fitted within void retrospective to roof construction. To fit common rafter centres. Be easily fixed.

<b>Product Specification</b>	
Code	<b>RR46</b>
Nominal Length	330mm
Nominal Width	310mm
Thickness	0.35mm
Material	PVC
Weight	0.11Kg
Colour	Black
Web Height	30mm
